

It's Time to

EXPOSE EXXON

[www.ExxposeExxon.com!](http://www.ExxposeExxon.com)

ExxonMobil is one of the world's largest and most profitable oil companies. Unfortunately, instead of leading our nation to an energy future that's cheaper, cleaner and less dependent on oil, ExxonMobil remains wedded to the past, intent only on short term profits rather than a clean environment for our families.

Failed Policies Exposed!

With soaring gas prices, ExxonMobil made a record \$25 billion in 2004, but lacks the vision to invest in cleaner, healthier energy and support greater fuel economy. This ensures continued high prices for consumers and small businesses.

Despite its record profits, ExxonMobil refuses to pay \$4 billion in punitive damages to fishermen and others harmed by the 1989 *Exxon Valdez* spill.

Threats to Our Natural Heritage Exposed!

Unlike other oil companies, ExxonMobil still denies the existence of global warming and opposes steps to cut global warming pollution. Since 1998, it spent over \$15 million to fund organizations that produce junk science designed to cloud the international debate about solutions to this urgent problem.

Broken Promises Exposed!

ExxonMobil is still actively pushing to open the pristine Arctic National Wildlife Refuge to dirty oil drilling.

Global Warming Charade Exposed!

Get the facts yourself at [www.ExxposeExxon.com!](http://www.ExxposeExxon.com)

Things you can do to Exxpose ExxonMobil:

- 1 Speed Past Exxon and Mobil gas stations! Don't buy the company's gas or products.
- 2 Don't buy ExxonMobil stock. If you have it, use your shares to change the company's environmental policies.
- 3 Don't choose ExxonMobil for a new job, or if you work there, call on the company to protect workers and the environment.
- 4 Visit www.ExxposeExxon.Com and write a letter to ExxonMobil's CEO Lee Raymond. Ask him to:
 - Protect, instead of drill, the Arctic National Wildlife Refuge.
 - Support mandatory caps on global warming pollution.
 - Stop funding junk science that clouds the debate on global warming.
 - Save consumers money at the pump and ease our oil dependence by investing in renewable energy and energy efficiency, and supporting fuel efficiency.
 - Pay all of the punitive damages awarded to fishermen and others harmed by the 1989 *Exxon Valdez* oil spill.
